UX Research & UX Writing
Coderhouse · 2022

UX Plus Bootcamp
Human Experience Hub · 2024

Project Management
Coderhouse · 2023

SUMMARY

Product Manager with 6+ years leading digital products **end-to-end** — from discovery to launch — in startups, government, and innovation environments. My background in **Industrial Design** taught me to read systems, understand users, and think about product as part of a single process. I combine **product strategy, UX, and technical execution** to deliver products that generate real business impact and user experience. I move comfortably between strategic vision and concrete implementation.

EXPERIENCE

Delivery Manager @ Educabot [EdTech] [Robotics]
Mar 2026 – Present

- Coordination of **internal strategic projects** with cross-functional teams, ensuring compliance with deadlines and deliverables through control dashboards
- Design of **executive reporting dashboards** to consolidate strategic information; definition of indicators and metric tracking per area to facilitate decision-making
- Management of **innovation initiatives**: internal ideation program and development of an educational robotics product

Co-founder & CPO @ Synerfy [B2B] [SaaS] [Event Tech]
May 2024 – Present

- Built from scratch a B2B platform that simplifies **corporate event management and networking** combining gamification and AI — defined product strategy, information architecture, and **roadmap end-to-end**
- Led UX, research, and validation with real users; coordinated the technical team for MVP development and managed the **go-to-market strategy** with first clients — **+500 users** in 3 months

Head of Innovation & Tech @ Buenos Aires Innovation Park
Apr 2025 – Jan 2026

- Defined and led the **technology roadmap** of the Park, prioritizing innovation initiatives and aligning technical teams with the entrepreneurial ecosystem objectives and public-private programs
- Designed and implemented the **end-to-end sales process**: CRM from scratch, communication automation and pipeline tracking — reducing operational times by **40%**
- Automated community, events, and communication operations — centralizing **+10,000 contacts** and enabling segmented campaigns; built dashboards by area eliminating manual tracking
- Developed internal analytics tools that reduced processing hours to minutes; designed and deployed **AI virtual assistants** across the ecosystem's digital channels

Product Manager & Designer @ Government of the City of Buenos Aires [GovTech]
Jun 2024 – Jan 2025

- PM of a public EdTech platform for entrepreneurs: defined roadmap, OKRs, and prioritization frameworks navigating the complexity of multiple government stakeholders with conflicting priorities
- Conducted UX research and usability iterations with real entrepreneurs; built product health dashboards and KPIs that enabled data-driven decisions at the executive level
- Applied agile methodologies to manage delivery cycles in a **complex institutional environment**, with multiple government areas with different priorities and tight timelines

Product Manager @ Pepino Project [Startups]
Apr 2021 – Sep 2024

- Worked with early-stage startup founders to transform business ideas into **scalable digital products** — from discovery to launch and market validation, leading more than **15 MVPs**
- Defined **product vision, strategy, and roadmap** for each product; managed backlog, user stories, acceptance criteria, sprint planning, and releases coordinating with development teams
- Conducted user interviews, **competitive benchmarking** and hypothesis validation throughout the **product lifecycle** — achieving **85% average satisfaction** in user validation

Production & Design Manager @ Mesquita Hnos
Apr 2022 – May 2024

- Led the design and production team; implemented **continuous improvement**, process mapping, and ISO compliance, managing end-to-end operations with a focus on efficiency and quality

SKILLS

PRODUCT MANAGEMENT
Roadmap · OKRs / KPIs · Product Strategy · Backlog · User stories · Acceptance criteria · Agile · Scrum · Kanban · Product Lifecycle · GTM · Lean

AI TOOLS
Claude Code · Cursor · Codex · Generative AI prompting · No-code + AI · ChatGPT · Perplexity · v0
